Get Ready for a Real Animation Education with L.A. Film School

If you have ever considered getting a hands-on education in animation and visual effects in the heart of Los Angeles, you should consider The L.A. Film School's rich programs. **Kenneth Norman**, animation and vfx program specialist and **Bre Roberts**, program manager of the animation online program at The Los Angeles Film School, answered a few of our questions about their school:

Can you tell us a bit about The L.A. Film School's Current Animation and VFX offerings.

We offer four animation concentrations at The Los Angeles Film School. On our Hollywood campus, we provide Visual Effects and Game Art. We offer Character Animation, Environment and Character Design, and Visual Effects for our online students.

What makes the concentrations stand out from other similar fare?

Our Animation degree has some unique features that set it apart from others. First, our faculty members have at least four years of experience working in the animation industry, making them a valuable asset to our program. Many faculty members maintain active employment within the industry while teaching, allowing them to bring our students the most up-to-date learning experience. Second, our curriculum is designed based on the pipelines currently used in the animation industry. Our program's design is another unique feature as we begin with a flipped curriculum for online concentrations, emphasizing the quality of the final output. Initially, we focus on camera, composition, and rendering using production-quality assets to build confidence, give students a better understanding of the high-quality assets they should aim to produce, and demonstrate their ability to create such assets.

What are some of the most popular classes in your program?

Courses where students have the most artistic freedom to explore their ideas are the most popular. Story-driven animation, Crowd Animation, Visual Effects for Games and Film, and Character Design are among our students' most popular courses in our animation degree program. Students love opportunities to bring their own stories to life.

What are the most important skill sets that will be taught in your program?

The Los Angeles Film School's Animation concentrations aim to equip students with diverse skills to succeed in the animation industry. Here are some key skill sets commonly taught in animation concentration programs:

Animation Principles: Understanding the core twelve principles of animation and how to implement them into 3D animation.

Character Design: Creating visually appealing and unique characters that fit within the context of the animation project.

3D Modeling and Animation: Utilizing industry-standard software for creating 3D models and animating characters and scenes.

Visual Effects (VFX): Incorporating visual effects into animations or live-action films to enhance the overall visual appeal.

Rigging: Understanding the process of creating skeletons and controls for 3D character models, enabling realistic movement.

Texturing and Lighting: Learning to apply textures to 3D models and effectively use lighting to enhance the visual quality of animations.

Industry Software Proficiency: Becoming proficient in industry-standard animation software such as Autodesk Maya and Unreal Engine.

Portfolio Development: Crafting a strong portfolio showcasing various final projects and demonstrating proficiency in the student's chosen career interests and styles.

Professional Development: Understanding the business aspects of the animation industry, including networking, job searching, and staying updated on industry trends.

What kind of advice would you offer prospective students who want to enroll in your program?

Your well-being should always come first. Trying to learn something new without a balanced lifestyle can significantly impact your concentration and health. Your mind and body need nourishment, sleep, and emotional support to absorb new learning content effectively. Our student advising team is available when life inevitably happens during our students' 36-month experience within The Los Angeles Film School.

The key to learning is to communicate appropriately and be open-minded. Most students come from a standardized learning background where they complete a project, accept the grade, and don't necessarily follow up on what they could have done better. They should think of college as more of a mentorship and push to understand the relevance behind what they are learning and how it aids them in their goals.

Find an organizational and time management paradigm that works for you. Set a particular time and place to work in your home. Understand you're not perfect, and we all slip up. Learn from

it, course correct, and rebalance your time.

Remember, every person you meet is an opportunity to connect and network. We offer multiple community events on campus and online, including game nights, seminars, and art jam sessions. Surrounding yourself with people who have similar interests will keep your motivation and engagement high. These connections could help you find opportunities after graduation as well. ♦

Head of admissions: Darcy Deal
Time of year offered: Fall & Spring Semesters
Application deadline: May 1, 2023
Equipment available: Adobe Creative Suite, Cinema 4D, Blender, Maya, Dragonframe, dedicated stop-motion studios, Edelkrone motion-control systems, traditional animation lightbox lab, digital pencil testers, sound mastering studio, Oculus Rift S, Rokoko Smartsuits Y

Notes: Starting with classical, experimental and analog techniques and then advancing through contemporary 2D & 3D digital/hybrid industry standards, students are exposed to the

full range of approaches without any one taking precedence over another. Instead, we lead our students to carve their own path through our unique mentor-based studio-instruction model. While creating, learning and collaborating alongside peers and dedicated faculty, our approach allows students to accumulate and master the necessary skills while receiving personal support from professionals and world-class visiting artists.

Our department produces animators who define rather than recite, lead instead of follow, and go on to enjoy fully sustainable creative careers.

Degrees/Certificates offered: The Los Angeles Film School offers a Bachelor of Science in

Animation with a concentration in Visual Effects or Game Art on campus and Visual Effects, Environment & Character Design or Character Animation for online students. The concentrations focus on the 12 principles of animation used by professional studios and students learn to apply that knowledge to their creations. Additionally, they build on the real-world animation pipeline in an experiential learning environment. In 2023, the Film Program introduced new programming in the Animation/VFX Program that allows shared classes with the Film Program, so students can develop on-set skills for visual effects artists and supervisors. The L.A. Film School also partners with several virtual production studios, giving students access to real-time production processes while also expanding the students' professional networking opportunities. Additionally, concentrations are 120 credit hours and typically take 36 months (about 3 years) to complete.

Number of students in animation program: The animation program, in four concentrations, consists approximately of 600 students.
Cost of program: Due to the variability of costs associated with each degree, please visit lafilm.edu
Head of animation: Campus: Robert Rowles, Associate Program Director; Online: Ken Norman, Program Director
Head of admissions: Ernesta Mensah
Time of year offered: Monthy
Application deadline: Year-round open enrollment

Equipment available: Los Angeles Film School's Animation TechKit® includes animation student's own MSI GE76 Raider laptop with Unreal Engine, Python, Autodesk Maya, Pixologic ZBrush and Nuke. Animation students also receive the entire Adobe Creative Suite, as well as a Wacom 16 Cintiq, Stealth Trooper backpack, gaming mouse and headset.

Miami Animation & Gaming International Complex (MAGIC)

at Miami Dade College
Miami, FL
magic.mdc.edu
Phone: 305 237 3560
Email: magic@mdc.edu
Degrees/Certificates offered: Industry-focused "Animation & Game Art" and "Game Development & Design" academic programs; college credit certificate in "Virtual and Augmented Reality Technologies"
Number of students in animation program: 768
Cost of program: \$7,093.20
Head of animation: Mauricio Ferrazza
Head of admissions: Sandye Palacios
Time of year offered: Fall Term
Application deadline: Registration begins April 5, 2023

Equipment available: MAGIC is a 9,000 square foot, state-of-the-art facility designed to mirror a working animation studio. The entire facility is wireless and committed to achieving a nearly paperless status. The open lab space features 30 workstations, each with a Cintiq HD 2200 Touch. Students have access to a creative tool set that allows them to draw characters, convert the work to vector art, and work with 3D animation, compositing, modeling, simulation and rendering. The pre and post production suite includes an audio engineering booth for recording sound. The motion-capture studio has a greenscreen, motion-capture equipment and motion tracking. All classrooms have workstations equipped with industry standard technology

and software. One classroom has 36 stations where students engage in project-based learning infused with the latest in the creative industries, animation, video game development, VR and AR technologies. **Notes:** MAGIC was inaugurated in 2015 and is the first facility of its kind at a public higher education in Florida. Modeled after a feature production studio, MAGIC has positioned itself as a new animation and gaming industry hub and has gathered enthusiasts, studio executives, software specialists, artists and others from around the country to collaborate in different initiatives. In 2018, The Aspen Institute and the Siemens Foundation awarded the MAGIC program at Miami Dade College with the Siemens-Aspen Community College STEM Award, in recognition of the outstanding preparation and education the program provides students seeking careers in science, technology, engineering and math.

Michigan State University
School of Journalism
East Lansing, MI
comartsj.msu.edu
